EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In page 1, of the specification, "This application is a continuation of United States Patent Application Number 09/572,353, filed May 17, 2000, the entire contents of which are incorporated by reference herein." has been deleted and replaced by -- This application is a continuation of United States Patent Application Number 09/572,353, filed May 17, 2000 and now U.S. Patent No. 6,616,199, the entire contents of which are incorporated by reference herein.--

2. The following is an examiner's statement of reasons for allowance:

The closest prior art of record fails to teach or suggest the recited thermal interface. Independent claim 16 identifies the uniquely distinct structure that includes a planar structure having a peripheral edge with a section extending beyond edges of an area where an electronic component and heat sink meet covered with a heat conductive composition on both surfaces of the structure having a composition of 60 to 90% weight paraffin and 10 to 40% by weight of graphite. Independent claim 20 identifies the uniquely distinct structure that includes a planar

Art Unit: 1772

structure having a peripheral edge with a section extending beyond edges of an area where an electronic component and heat sink meet covered with a heat conductive composition on both surfaces of the structure having a composition of 60 to 90% weight paraffin and 10 to 40% by weight of graphite and melting point of 51 to 60 °C. Independent claim 24 identifies the uniquely distinct structure along with method of using compression to engage the surfaces. The closest prior art of record, Freuler et al. (USPN 6,616,999), discloses a thermal interface pad, which anticipates the invention. However, there is common inventorship between the current application and the prior art, and the Applicant has filed a terminal disclaimer to overcome the inventorship issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia L. Nordmeyer whose telephone number is (571) 272-1496. The examiner can normally be reached on Mon.-Thurs. from 7:00-4:30 & alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Y. Pyon can be reached on (571) 272-1498. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
